

PERKO®

Cat. No. 0652 Series LED Bi Color Lights

Cat. No. 0653 Series LED Side Lights

The above lights are designed for use on power driven vessels under 20 meters (65.6 ft.) in length operating on a nominal 12 volt system. In order to comply with '72 COLREGS and the U.S. Inland Rules, the following must be adhered to:

MOUNTING INFORMATION

Read all instructions before proceeding

- 1). For proper light selection, positioning and configuration, refer to the A.B.Y.C. Standard A-16*, the '72 COLREGS* and the U.S. Inland Rules*. These lights are supplied complete with 12 volt LED. There are no user serviceable components.
- 2). These lights are designed to be mounted on a horizontal surface.
- 3). Draw a 6 inch long reference line through the center of the selected mounting location and parallel to the centerline of the boat.
- 4). Cut out the mounting template. Place it on the mounting surface such that the reference line (drawn above) is directly underneath the reference line marked on the template.
- 5). Drill three holes through the template using a 1/8" drill to accommodate the two alignment pins and a #8 round or pan head mounting screw. Drill a 1/4 inch hole to accommodate the electric wiring.
- 6). Attach supply connections to the light, making sure to wire in accordance with both A.B.Y.C. Standard E-9* and U.S. Coast Guard Safety Standards for Boat Electrical Systems (33 CFR 183)*. Observe Polarity.
- 7). Mount the light in accordance with the template. Note that there are thin reference marks around the outside of the base that must be aligned with the reference line (drawn in Step #3) for final accuracy of mounting orientation.

* The above referenced Standards can be obtained from.
